SCS

S.C. SWIDERSKI LLC

CYBER SECURTIY AWARENESS

Session Objectives

You will be able to:
- Understand safe communication habits
- Recognize phishing attacks
- Reduce physical security risks
- Protect information and data
- Maintain device security

What is Cyber Security Awareness?

- Combination of both knowing and doing something to protect a business's information assets.
- When a company's employees are cyber security aware, it means they understand
  - what cyber threats are
  - the potential impact a cyber-attack will have on their business
  - the steps required to reduce risk and prevent cyber-crime

Cyber Security Awareness

- The best way for any company to combat this threat is to create a risk-aware workplace culture
